*This is a quick, **<u>anonymous</u>**, questionnaire designed to assess your pre-existing knowledge; it will help me tailor the course better to what you know.*

- Do you know how to program in Python? How would you describe your Python programming abilities (e.g., none at all, beginner, intermediate, advanced, "I'm Guido van Rossum")?

- Have you ever used IPython notebooks? In what context and how extensively?

- Have you used Numpy? How familiar are you with it?

- Have you used git? If yes, how often and in what context?

- Have you ever created and merged branches in git? How often and in what context?

- Do you have a github account?

- Have you ever used matplotlib? How frequently and in what context?

- Have you ever used AstroPy?

- Have you ever used Pandas?

- Have you ever used relational databases? If yes, which ones? How often and in what context?

- Have you ever written SQL queries? How familiar do you think you are with SQL?

- How familiar are you with Linux? Would you know how to log into a remote machine with *ssh*?

- Do you know what a color-magnitude diagram is? What is it used for?

- Did you ever hear of the Sloan Digital Sky Survey? If yes, in what context (and how familiar are you with what it is)?
